

200-WS-21P Power Pack

The **200-WS-21P Power Pack** is ideal for powering NovaLynx Dual Setpoint Alarms. The 12Vdc output operates the processor and display. A separate power source may be needed for equipment that is connected to the controller's output relays.

The power pack is suitable for indoor use. The 5' cable and included disconnect terminals make for easy connection.

Compatibility

- Dual Set Point Wind Alarms (200-WS-21-A)
- Dual Set Point Temperature Alarms (210-421-A, Air Temperature)
- Dual Set Point Temperature Alarms (210-421W-A, Water & Soil Temperature)

Features

- 12 VDC output (up to 1 amp)
- 100-240 VAC, 50-60 Hz, 0.5A input
- USA plug. EURO adapter available.
- Red LED illuminates when operating
- ¼" female disconnect terminals
- 1.5 m (5') cable
